Dear Michael,

I recently had the enviable opportunity of designing from a blank sheet of paper, a brand new office for my 23-year old Optometric practice in Harford County.

Dan Scott, of your firm, was brought in from Day One to work with the architect and civil engineer to achieve continuity throughout the design and build processes. Mr. Scott's expertise and the resources behind CCC were evident and valued by all parties involved.

I was presented with a construction schedule the week ground was broken, and it never varied more than 2-3 days and 2-3% of budget, right up to our move-in day. Being a stickler for detail, I was allowed access to the project at all times, and not only were my ideas and last minute changes entertained, they were encouraged, and led to the construction team to contribute their own suggestions. I cannot more strongly recommend this fine team of professionals for anyone's construction project, of any size. Thank You.
